

## **SPRINT REVIEW MEETING 4**

### **REVIEW OF GOALS**

All tasks for user stories have been completed. User is able to buy and sell on the app. User is also able to upload an image on profile and edit what they are selling. The app will generate a receipt for user after they successfully purchase.

We are still having troubles with testing each user story.

The diagramming is good and corresponds to user stories and task we might do in future sprints.

The Design UI of every part is well put.

We are using the lamp server for the app.

### **DEFINITION OF DONE**

- ☒ Able to buy.
- ☒ Able to sell.
- ☒ User can upload an image to profile.
- ☒ Messy and poorly designed code has been cleaned up through refactoring.
- ☒ We have a working server.
- ☒ User is able to edit their sale.
- ☒ The app generates a receipt after successful purchase.

Our Definition of Done has been partly met. Testing is still an issue we have.
