

## DAILY SCRUM MEETINGS 4

### FULL METTINGS

[09:06, 5/26/2021] Rumbi ❤️ ❤️ ❤️: What I was thinking I can try to do for now, is do the other codecov that hasn't been done yet. And I am willing to also cover up the things for services like tutoring, etc.

[09:13, 5/26/2021] Donovan: I'm willing to do uploading an image on profile or able to buy

[10:40, 5/26/2021] +27 73 880 8874: I feel loko since me an Kat started with the product and service thing we should continue with it

[10:43, 5/26/2021] Rumbi ❤️ ❤️ ❤️: Alright sure that's fine

[10:44, 5/26/2021] Rumbi ❤️ ❤️ ❤️: Then I also don't mind the generating a receipt

[13:06, 5/26/2021] +27 79 826 0547: What user stories are left?

[13:23, 5/26/2021] Donovan: I'll take the uploading image one

[13:28, 5/26/2021] Rumbi ❤️ ❤️ ❤️: Uploading what you want to sell, edit the upload, and able to buy

[13:29, 5/26/2021] Katlego Project: I think that goes with market place.

[13:30, 5/26/2021] Katlego Project: You can add products to the cart and checkout @Magape

[13:31, 5/26/2021] Katlego Project: Like from the market place to the cart to so that a user can buy.

[13:35, 5/26/2021] Rumbi ❤️ ❤️ ❤️: I can only generate a receipt after a user can buy as well.

[13:36, 5/26/2021] Katlego Project: And he can add after we make it possible to upload a product

[13:48, 5/26/2021] +27 79 826 0547: Okay cool 👍

[14:15, 5/26/2021] Katlego Project: Who's @BBA-5710399 ?

[14:28, 5/26/2021] +27 79 826 0547: Sorry that's my other number. I'm gonna delete the WhatsApp for this one soon

[14:29, 5/26/2021] Katlego Project: No stress homie 👍

[15:39, 5/27/2021] Rumbi ❤️ ❤️ ❤️ : Hey guys

I'm really failing to understand how to do the testing. Can I please get some help

[13:55, 5/28/2021] Rumbi ❤️ ❤️ ❤️ : ??

[10:32, 5/29/2021] Rumbi ❤️ ❤️ ❤️ : Hey guys

I think testing should be assigned to 1 person. I think its going to be easier that way. Plus I have been searching and trying to find help with that and no luck. I really don't know how to approach the testing.

And guys can we at least try get things done for this sprint as early as possible and not last minute.

[13:28, 5/29/2021] Rumbi ❤️ ❤️ ❤️ : Any updates on the progress so far?

[13:30, 5/29/2021] Katlego Project: We can now create an add just haven't been able to upload the add

[13:41, 5/29/2021] Rumbi ❤️ ❤️ ❤️: @Naette can you please do the diagramming and are you able to do testing?

[13:43, 5/29/2021] Katlego Project: We havent tested anything

[13:44, 5/29/2021] +27 84 893 0176: I already did the diagramming like some days ago and I was actually trying to see I can get any info on testing. I didn't want to jump on stuff that I didn't know but I'm still on the search

[13:46, 5/29/2021] Rumbi ❤️ ❤️ ❤️: Yes, I'm speaking about the previous things we've done that are not tested yet because testing really needs to be done. I'm just failing to understand how to do the testing and when I mentioned it no one responded. We cannot leave our codecov by 1% because that is a lot of marks lost.

[13:47, 5/29/2021] Rumbi ❤️ ❤️ ❤️: Alright no problem

[13:48, 5/29/2021] Katlego Project: I haven't had time honestly. But I'll look it up

[12:26, 5/31/2021] Rumbi ❤️ ❤️ ❤️: Hey

How is the progress so far?

[14:17, 5/31/2021] Donovan: I feel like I need to make few changes here and there. Maybe add a button.

[14:35, 5/31/2021] Rumbi ❤️ ❤️ ❤️: If it's possible to do that and there is time then it's fine

[14:35, 5/31/2021] Donovan: Are you winning on your side?

[14:37, 5/31/2021] Rumbi ❤️ ❤️ ❤️: Im still trying to figure out how to do it as well, testing is really difficult and it's really time consuming.

And as soon as we are able to buy product I will be able to do my part of generating a receipt.

[14:57, 5/31/2021] Donovan: This testing thing is a nightmare 😞😞

[18:34, 6/2/2021] Rumbi ❤️❤️❤️: Hey guys

How is the progress going

[18:38, 6/2/2021] Katlego Project: Things are going well from our end, I hope everyone knows that we don't have to wait for each other to build, we can build and then combine later

[18:43, 6/2/2021] Rumbi ❤️❤️❤️: I'm going to start uploading documents on github tomorrow and taiga too and hopefully we are able to pass all acceptance criterias

[19:27, 6/2/2021] +27 73 880 8874: this guy gave us 70 for sprint3

[19:28, 6/2/2021] Katlego Project: I saw that

[14:04, 6/5/2021] Rumbi ❤️❤️❤️: Hey

How far are you guys

[14:14, 6/5/2021] +27 67 775 8423: I'm gonna code add to cart today...and hopefully try to write tests for all the code I'd written

[14:15, 6/5/2021] Katlego Project: I'm also finishing our end and moving to tests.

[15:53, 6/5/2021] Rumbi ❤️❤️❤️: Who is doing the able to buy?

[15:56, 6/5/2021] Katlego Project: @BBA-5710399 is doing everything there

[15:57, 6/5/2021] Rumbi ❤️ ❤️ ❤️ : I think I will need a page to be opened after purchasing for the receipt to show

[16:50, 6/5/2021] +27 67 775 8423: My task is add to cart

[16:51, 6/5/2021] +27 67 775 8423: Is this for @Donovan since he code add funds last time

[16:58, 6/5/2021] Donovan: I'm doing the uploading profile Pic

[17:04, 6/5/2021] Rumbi ❤️ ❤️ ❤️ : I need a way to generate a receipt after purchasing.

[17:05, 6/5/2021] +27 67 775 8423: 🤔 hhm,okay. I will do it after add to cart

[17:18, 6/5/2021] +27 67 775 8423: Wait which part did you code?

[17:24, 6/5/2021] Rumbi ❤️ ❤️ ❤️ : Just finishing up the looks of the receipt. Then it would be possible to add the amount and item on the receipt.

[17:38, 6/5/2021] +27 67 775 8423: Okay...cool.

[17:44, 6/5/2021] +27 67 775 8423: Where are the products displayed in the market place coming from?

[17:57, 6/5/2021] Rumbi ❤️ ❤️ ❤️ : I think there should be coming from the uploading of what you are selling and we can probably just manually add some products

[18:05, 6/5/2021] +27 67 775 8423: Okay..let me create the table then

[04:07, 6/6/2021] +27 67 775 8423: Tell me the info you need for the receipt, e.g getting you the list of items bought and the total amount due.

[04:09, 6/6/2021] +27 67 775 8423: Im done with loading items to the cart, buying and created the involved tables and php's.

I haven't done add to cart because it depends on something that's not yet done.

[10:24, 6/6/2021] Rumbi ❤️ ❤️ ❤️: I will just need the list of items with the price and the total amount

[10:34, 6/6/2021] Rumbi ❤️ ❤️ ❤️: This is how I made the layout of the receipt

[12:58, 6/6/2021] +27 67 775 8423: Nice 🙌, let me structure the data for you

[13:37, 6/6/2021] +27 67 775 8423: Done, it is still pushing and building on TravisCI, once it is done you can pull and check line 139-141 in Dashboard.java(which is the Cart class)

[17:30, 6/6/2021] Rumbi ❤️ ❤️ ❤️: I'm a bit confused, where is the generate receipt

[18:07, 6/6/2021] +27 67 775 8423: What do you mean i thought you did that?

[18:26, 6/6/2021] Rumbi ❤️ ❤️ ❤️: Oh 🙄 🙄

Sorry, I thought you meant like something you named generate receipt. I just realized it

[18:27, 6/6/2021] +27 67 775 8423: Ohh, okay cool 👍

[04:31, 6/7/2021] Rumbi ❤️ ❤️ ❤️: I think something is wrong with the structuring of data, I keep getting the wrong price after checking out

[09:59, 6/7/2021] +27 67 775 8423: The total or for each item? Let me pull and give it a look

[10:58, 6/7/2021] +27 67 775 8423: I pulled ,and been looking but I don't see where you link the data from the Dashboard to your receipt

[11:07, 6/7/2021] Rumbi   : Imma put it on Github now

[11:19, 6/7/2021] Rumbi   : I have loadshedding and my laptop just switched off since it only works while on charger 

I'm not sure if it pushed but I think it had pushed.

[11:20, 6/7/2021] +27 67 775 8423: Ohh, no stress. I refreshed github and It doesn't look like it pushed. I will try to link them up
